

43" Full HD Touchdisplay

POS Touchscreen Terminal - with WiFi incl. Android 9.0 & Full HD Touchdisplay

This appealing POS terminal catches the eye directly thanks to its shapely Full HD touch screen and encourages your target group to interact. Discover all the advantages directly:

- **Sophisticated floor-standing display:** the innovatively curved terminal display system impresses with a stable, white-painted steel base that fits beautifully into a wide range of interior spaces. The overall dimensions of the system are 99.8 x 115 cm.
- **With touchscreen & Android 9.0:** The 43" full HD touchscreen has an ideal viewing angle, can be operated completely intuitively and, thanks to the pre-installed Android 9.0 operating system, can be individually adapted to your advertising needs. For example, with suitable apps from the Google Playstore.

- Simply upload content: You can either upload your important moving image content conveniently via Plug & Play (USB 2.0) or use the terminal's wireless WiFi function, for example via a cloud-based interface.
- Convincing hardware: The popular Kiosk touchscreen terminal impresses with its high-quality and durable hardware components. This also makes it easy for you to use our cloud-based signage software on your POS touchscreen terminal. This is guaranteed to get even more out of your digital carrier.
- Flexible use: You can use the touchscreen terminal for various other locations, for example for presenting your innovations trade fairs or promotional events etc.
